

Special Use Couplings

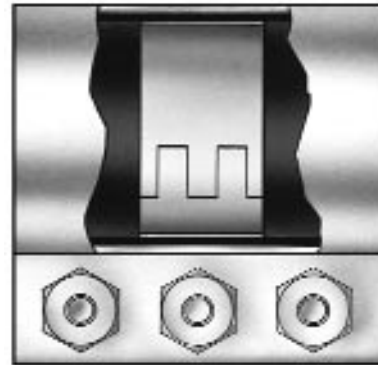

In addition to standard compression couplings, Advanced Bulk and Conveying, Inc., offers a full selection of special use couplings.

Couplings with Stainless Steel Gasket Protectors

Provide positive gasket protection against abrasion or corrosion in pneumatic conveying systems.

Eliminates:

- Costly Downtime
- Frequent Gasket Replacement
- Gasket Being Drawn Into the Pipeline
- Product Contamination

*Side-Band Compression Couplings

Maximum holding power to connect pipe and tubing.

Unique design with:

- Improved Axial Force Holding Power
- Dual-Locking Side Bands and Two One -Piece Longitudinal Bars to Withstand End Pull
- Higher Operating Pressure
- Size Ranges From 2" O.D. Through 24" O.D. Pipe or Tubing Sizes

* Especially effective where line vibration is a problem

Quickon II Couplers® (Single and Dual)

Quick and efficient installation or removal of pneumatic and vacuum conveying lines or systems with a twist of the wrist - no tools required.

Application provides:

- Fast Take Down and Reassembly of Lines
- Reduced Coupler Weight
- All Stainless Steel Construction
- Sizes Range From 1-1/2" Through 12-3/4" O.D.
- Standard Gasket is Gum Rubber; Food Grade Gasket Available
- Positive Locking System
- Up to 50 PSI Available on Dual Quickon II Couplers®
